

Noticeboard

I am now in a position to accept collections and show enquirers some of the presses we might have ready for forthcoming deliveries.

Below is some of the projects I have sales for and will shortly have them assembled and photographed.

Later in the year I will be building a one Off either a Cachet or Boxer press, if you are interested get in touch. These are fabulous presses, the reason I stopped regular manufacture was due to their weight and difficulty in installing. I am older and need to preserve myself for the coming years.

Later in the year I am intending to exhibit at the Woolwich Print Fair. Along with the Baby Boxer Press (spec below) I will be taking a 30cm Pequeno Press and for demonstrations a 35cm Gem Press. All the presses will be on stands with castors.

1. One only, Baby Boxer press. This press **TO BE EXIHIBTED LATER IN THE YEAR**
Has a 40cm x 81cm bed and a gear ratio of
13.5 :1 . It also comes with a 45cm Stainless
Steel rim wheel and finished in Caribbean
This press needs to be assembled and photographed
And properly valued.
This press is the best 40cm press I have ever made or
seen and it hard to think how it could be bettered.
No one in the UK builds presses like this.
