

Delivery details

For ease and safety, delivery for presses is normally done by ourselves. These deliveries are usually on a shared basis to keep costs down. Costs for these deliveries depend on any installation work, as well as customer location.

Rollaco Presses must be told of any difficult siting you may require for your press such as upper floors or places of poor access.

In certain circumstances presses may be sent by carrier. These would be packaged on a wooden pallet.

There may be limit to where we will travel for a delivery. In cases where the distance is too great we can accommodate and meet the customer at a pre-arranged location.

In special cases we may be prepared to travel long distances assuming the customer is prepared to fully cover costs.

Many of my deliveries are two or three days with an overnight stay so most of the destinations are covered.

Benefits of a personal delivery include set up and simple instructions on use, it also includes safely positioning of the press. No heavy machines for you to manhandle.

Collection of presses can be arranged but they have to be Mon to Fri not weekends.

Rollaco Presses endeavours to give a good delivery service both reliable and safe.

Please remember delivery is not a postal service, it is a scheduled operation covering 2 to 4 customers with organised assistance and accommodation.
